

Evolution E2

Company: Armas Jaramillo
Location: Ecuador
Name: Juan Millan
Product: Evolution E2
Application: Large Format Print

Executive Summary

Armas Jaramillo purchased the Evolution in 2013 to service their large format printing work. This was the first Keencut product they had purchased.

Challenges

Armas Jaramillo purchased the Keencut Evolution in 2013 as they needed a product to use for their large format printing services. They use it usually to cut banners, corrugated plastic, foam board, PVC board (2-5 mm), adhesive vinyl and photo paper.

How Product Helped

By enabling the business to cut a large range of materials for their large format print jobs, the Evolution helped Armas Jaramillo work faster and more efficiently. It has minimised time daily in terms of work in the large format printing business.

Testimonial

Juan Millan of Armas Jaramillo says: *“Overall, we are very satisfied with the Evolution. We believe it’s a high-quality product that has helped minimise time for daily work in the large format printing business. It is an extremely versatile product and is a great addition to the workshop.”*
